If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claims 21-24 have been withdrawn as non-elected invention, now hereby are canceled upon the allowance of elected claims 1-4, 7-11, 13-20, 25, 28 and 29, since the applicants made the election without traverse.

The application has been amended as follows:

Listing of amended claims 21-24:

21. (Examiner amended) Canceled.
22. (Examiner amended) Canceled.
23. (Examiner amended) Canceled.
24. (Examiner amended) Canceled.

### ***Status of the Application***

New claim 29 has been added.

Claims 5-6, 12, 21-24, 26 and 27 are cancelled.

Claims 1-4, 7-11, 13-20, 25, 28 and 29 are allowed.

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

The prior art does not show or fairly suggest the claimed invention of an optical connection structure having the claimed structure and claimed limitations, wherein a rejection under 35 USC 102 or 103 would be improper.

**Yasuhiro et al (JP 2001-124958)** is the most relevant prior arts of record.

**Yasuhiro et al.** teach an optical connection structure as shown in figures 1 and 2. The structure includes a solid viscous connection member (2) having a refractive index matching that of the optical transmission media (1) (see lines 9-14 of the English translation abstract). The connection member is adheringly disposed in a single layer between the end face of and optical transmission media (1) and an optical component (5) that are mutually opposing as shown in figure 2.

Regarding **claims 1 and 8, Yasuhiro et al.** alone or in combination, however, still fail to teach that the “viscous connection is a sheet-shaped viscous connection member”, wherein “...minimum value D of the distance from the center of the end face of the optical transmission medium, having a radius R and contacting said viscous connection member, to the periphery of said viscous connection member is within the range  $2R \leq D \leq 60R$ ” and “the maximum distance D2 from the center of the core of the optical transmission medium to the periphery of the viscous connection member satisfies the relation  $D2 \leq 1.5R$ , where R is the radius of the optical transmission medium”. Thus the range for the minimum value D of the distance from the center of the end face of the optical transmission medium to the periphery of the viscous connection member, prevents the viscous connection member from breaking as to achieve a stable connection, and further providing a sufficient adhered area to between entire end faces of optical transmission components in order to reduce transmission loss.

Therefore in light of the Applicant's amendment, claims 1 and 8 are allowable as distinguishes over the prior art of record because of the reason stated above. It is this examiner's position that prior art taken alone, fails to disclose or render obvious in combination with the rest of the limitations of base claims.

Claims 2-4, 7, 9-11, 13-20, 25, 28 and 29 are allowable as dependent claims of claims 1 and 8.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
